His queries often return zero results		Josh often has to utilize several different tools that each contain different datasets.	
leaves him questioning if his query syntax was wrong	leaves him questioning if the data does not exist	tools he relies on were not designed with this type of discovery and analysis in mind	reli
ZERO RESULTS QUERY SYNTAX WAS INCORRECT	DATA IS MISSING DATA DOES NOT EXIST	TOO MANY TOOLS MULTIPLE DATA FORMATS	
Doesn't know how to structure queries properly due to inexperience	Unsure if a gap is due to his query syntax or if the data does not exist	Can miss gaps in data due to no error/gap or system problem notifications	Ar
Doesn't know what other syntax to try when a query fails	Unsure how to investigate and/or solve gaps when they occur	Does not have time to manually investigate gaps/errors	T
		Challenging to clean data that is in diff formats due to inexperience	
		Data analysis is difficult since each tool has its own format	

It is often difficult to analyze the data altogether.

relies on tradecraft and addtl. investigation to help when stuck

RESULTS NOT BEING UNDERSTANDABLE

Josh often has to utilize several different tools that each contain

INEXPERIENCE

Analysis stalls while Josh uses up time consulting tradecraft

Time consuming to take notes and document process
